

Robotics Team Interest Form

The SJV Cyclobots is a middle-school Robotics team. We compete using the VEX-IQ Robotics system. The team meets weekly and competes in several robotics challenges throughout the school year, usually on Saturdays.

The competition is designed for students in grades 5-8. The SJV Cyclobots have limited space, so priority will be given to past team members and students in higher grades.

If your child is interested in joining the team or if you have additional questions, please contact Coach Matt.

Coach: Matt Radio
